1. Results of Operations

(1) Overview of operating results for the fiscal year under review

During the fiscal year under review, although wages in Japan continued to rise steadily, the pace of increase failed to keep up with the sharp surge in prices, particularly for food products. As a result, real wages and consumer spending remained under pressure, with no full recovery in sight. Despite the "Japan–U.S. tariff agreement," the U.S. continued to impose additional tariffs on individual items. Combined with the prolonged weakness of the Chinese economy, these factors made it difficult for companies to formulate concrete plans for exports and capital expenditures.

Given this environment, in addition to the 100-yen shop business in Japan, the Company, which operates the "Watts", "Watts with", "meets.", "silk", etc., has been working on diversifying its revenue sources by undertaking other domestic businesses, centering on the sale of lifestyle goods and discount goods as well as overseas business.

In the domestic 100-yen shop business, the Company implemented the following initiatives: introduction of collaborative products featuring celebrities and anime characters, launch of new items under "fasmy," its original cosmetic brand, promotion of the in-store pickup service for the Watts Online Shop, expansion of the lineup of higher-priced products (non-100-yen items) and replacement of products to better meet customer needs, and introduction of self-checkout registers to streamline payment operations.

Regarding store openings and closures, the Company opened 142 new stores against the full-year plan of 152. There were 77 store closings (including 5 franchised stores), including certain unprofitable stores and unpredictable closing of stores where the Company's stores were located in. As a result, the total number of 100-yen shops at the end of the fiscal year under review was 1,877, which includes 1,868 directly managed stores (net increase of 70), and 9 franchised/other stores (net decrease of 5). Of these, the number of the Watts brand stores "Watts" and "Watts with" was 1,516 (net increase of 133), accounting for more than 80.8% of the total.

As for the number of the other domestic stores, "Buona Vita," a lifestyle goods store offering comfortable life, stood at 10 stores (net decrease of 2). "Tokino:ne", a household items store under the theme of "time", operates 1 directly-managed store (unchanged), and its brand items are also available as dedicated sections within 100-yen shop tenant stores. "Value 100," a collaboration store with a fresh food supermarket, operates 1 store (unchanged), while the discount store "Real" operates 7 stores (unchanged).

Regarding the overseas operation, the Company operates "KOMONOYA", a fixed-price store mainly in Southeast Asia. KOMONOYA had 1 store in Thailand (a net decrease of 13) and 3 stores in Peru (a net decrease of 2). In China, all 4 stores of KOMONOKAEN (小物家园), another fixed-price store brand, were closed. As a result, the total number of overseas stores under the Company's own Watts and KOMONOYA stood at 4 (a net decrease of 19).

As a result of the above, for the fiscal year under review, sales totaled 61,578 million yen (up 0.5% YoY, 99.3% of the plan), operating profit was 1,419 million yen (up 13.8% YoY, 105.1% of the plan), recurring profit was 1,429 million yen (up 16.4% YoY, 109.9% of the plan), and net income attributable to owners of parent was 870 million yen (down 3.7% YoY, 91.7% of the plan).

Sales increased mainly due to solid performance at existing 100-yen shops and were generally in line with the plan.

On the profit front, the gross profit margin improved due to a decline in the procurement cost for miscellaneous goods, including higher-priced products, as well as the implementation of initiatives aimed at increasing the sales composition ratio of miscellaneous goods and higher-priced products. While selling, general and administrative expenses rose, reflecting higher variable costs associated with sales growth, increased utilities expenses, and higher depreciation mainly due to the introduction of self-checkout systems, operating profit and recurring profit both increased thanks to the growth in gross profit. Net income attributable to owners of parent decreased, mainly because a compensation income of 113 million yen was recorded as extraordinary income in the previous fiscal year. (Year-on-year comparisons are based on the results for the previous fiscal year. Comparisons with the plan are based on the full-year consolidated earnings forecast for the fiscal year ended August 2025, as announced in the Summary of Financial Results on October 10, 2024.)

Since the Group operates under a single segment consisting of the operation of 100-yen shops associated business, segment information is omitted.

(2) Overview of financial position for the fiscal year under review

(Assets)

As of the end of the fiscal year ended August 2025, current assets stood at 21,185 million yen, a decrease of 2,864 million yen from the end of the previous fiscal year. This was mainly due to the fact that the final day of the previous fiscal year fell on a bank holiday, causing a portion of payments to be carried over into the fiscal year under review. Cash and deposits decreased by 3,192 million yen, and notes and accounts receivable - trade decreased by 28 million yen, while merchandise and finished goods increased by 402 million yen. To maintain favorable relationships with suppliers, the Company changed its payment policy starting from the fiscal year under review, such that when the scheduled payment date falls on a bank holiday, payments are, in principle, made on the immediately preceding business day.

Noncurrent assets stood at 6,325 million yen, increasing by 95 million yen from the end of the previous fiscal year. This was mainly due to increases of 275 million yen in tools, furniture and fixtures, 19 million yen in deferred tax assets, and 11 million yen in guarantee deposits, while there were decreases of 131 million yen in goodwill and 83 million yen in software included in other intangible assets.

As a result, total assets stood at 27,510 million yen, a decrease of 2,769 million yen from the end of the previous fiscal year.

(Liabilities)

As of the end of the fiscal year under review, current liabilities stood at 11,021 million yen, a decrease of 3,095 million yen from the end of the previous fiscal year. This was mainly due to the fact that the final day of the previous fiscal year fell on a bank holiday, causing a portion of payments to be carried over into the fiscal year under review. Notes and accounts payable—trade decreased by 1,688 million yen, electronically recorded obligations decreased by 1,182 million yen, and accounts payable—other, included in other current liabilities, decreased by 558 million yen, while current portion of long-term borrowings increased by 298 million yen. To maintain favorable relationships with suppliers, the Company changed its payment policy starting from the fiscal year under review, such that when the scheduled payment date falls on a bank holiday, payments are, in principle, made on the immediately preceding business day.

Noncurrent liabilities totaled 3,459 million yen, a decrease of 186 million yen from the end of the previous fiscal year. This was mainly due to a 245 million yen decrease in long-term borrowings, partially offset by a 53 million yen increase in retirement benefit liabilities.

As a result, total liabilities stood at 14,480 million yen, a decrease of 3,281 million yen from the end of the previous fiscal year.

(Net assets)

As of the end of the fiscal year under review, total net assets stood at 13,029 million yen, an increase of 512 million yen from the end of the previous fiscal year. This was due to an increase of 468 million yen in retained earnings and a decrease of 37 million yen in treasury stock.

As a result, shareholders' equity ratio stood at 47.3% (41.3% at the end of the previous fiscal year).

(3) Overview of cash flows for the fiscal year under review

Cash and cash equivalents (hereinafter referred to as "cash") at the end of the fiscal year under review amounted to 6,187 million yen, a decrease of 3,192 million yen compared with the previous fiscal year.

The main factors behind this decrease were that the final day of the previous fiscal year fell on a bank holiday, resulting in certain payments being carried over and settled in the fiscal year under review, and that although the final day of the fiscal year under review also fell on a bank holiday, the Company changed its payment policy to make payments on the immediately preceding business day, which reduced trade payables under cash flows from operating activities.

Details and breakdown of each cash flow in the fiscal year under review are as follows.

(Cash flows from operating activities)

Net cash used for operating activities was 1,768 million yen (4,043 million yen was provided in the previous fiscal year). The main components of cash outflows were a decrease of 2,871 million yen in trade payables, payments of 477 million yen for income taxes and other taxes, and an increase of 408 million yen in inventories. The main components of cash inflows were income before income taxes of 1,369 million yen and depreciation of 815 million yen.

(Cash flows from investing activities)

Net cash used for investing activities was 1,079 million yen (538 million yen was used in the previous fiscal year). This was mainly due to purchase of property, plant and equipment of 961 million yen, purchase of intangible assets of 84 million yen, and payments of leasehold and guarantee deposits of 71 million yen. Cash was provided mainly by proceeds from refund of leasehold and guarantee deposits of 50 million yen.

(Cash flows from financing activities)

Net cash used for financing activities was 351 million yen (233 million yen was provided in the same period of the previous fiscal year). Cash was used mainly for long-term loans payable of 1,347 million yen and cash dividends paid of 401 million yen. Cash was provided mainly by proceeds from long-term loans payable of 1,400 million yen.

(4) Future outlook

The Company believes that a sustained recovery in personal consumption will require a stable environment in which real wages remain in positive territory. In terms of corporate trends, the Company expects developments to unfold while closely monitoring the final resolution of the “Japan–U.S. Tariff Agreement” (including the possibility that reciprocal tariffs themselves may be ruled unconstitutional and abolished), the monetary policies of both Japan and the U.S. and the resulting yen–dollar exchange rate, resource prices, and the economic conditions of overseas markets such as the U.S., Europe, and China.

Under these circumstances, while maintaining the Company’s commitment to the 100-yen price point, the Group will continue to offer value-for-money products across a broader range of price points. In addition, the Company will further refine its business model to respond to increasingly diverse customer needs and strive to create stores that deliver value exceeding the price customers pay.

Furthermore, with the aim of building a new revenue source to complement the 100-yen shop business, the Group is actively working on developing lines like “Buona Vita”, “Tokino:ne” and “Real”, to provide the new driving force for further growth in the future.

As for the overseas business, the Company will strive to expand existing business and develop new markets, in order to further expand the sales share within the Group and to earn profits.

Based on the above, the Company expects the following performance for the next fiscal year: sales of 63,000 million yen (up 2.3% year on year), operating profit of 1,500 million yen (up 5.7% year on year), recurring profit of 1,500 million yen (up 5.0% year on year) and net income attributable to owners of parent of 900 million yen (up 3.4% year on year).

(Notes) Equity ratio: Equity/Total assets

Market value equity ratio: Total market capitalization/Total assets

Interest-bearing debt to cash flows ratio: Interest-bearing debt/Operating cash flow

Interest coverage ratio: Operating cash flow/Interest payment

1. Total market capitalization is calculated by multiplying closing stock price at the end of the period by the total number of shares issued at the end of the period (excluding treasury stock).
2. Net cash provided by operating activities in the consolidated statements of cash flows is used as ‘Operating cash flow.’
3. Interest-bearing debt includes all debt on which interest is paid reported on the consolidated balance sheet.
4. For interest payment, interest expenses paid in the consolidated statements of cash flows are used.
5. The “Interest-bearing debt to cash flows ratio” and “Interest coverage ratio” for FY8/25 are not presented, as operating cash flow was negative.

2. Basic Policy Regarding Selection of Accounting Standards

In order to secure comparability with domestic peer companies, the Company applies Japanese accounting standards.
